COMPLIANCE TEST NOTIFICATION FORM Gasoline Dispensing Facilities	A.I. No:
	AGENCY USE ONLY

Facility Name (as recorded on your Registration Form # DEP 7105):	Date received:
Address:	Phone:	Log No:

City, State, Zip

Owner:

Section 1.	**REASON FOR COMPLIANCE TEST** (please check one)

☐ A new Stage II system has been installed   ☐ An existing Stage II system is being tested

☐ A Stage II system has been replaced or modified   ☐ Five-year Repeat of Testing for an existing Stage II system

Section 2.	**TESTING CONTRACTOR**

Name of Tester:

Company:

Address:	Phone:

City, State, Zip:

Section 3.	**COMPLIANCE TEST DATE**

(1) On what date and time is the compliance test scheduled?

(2) Which tests will be conducted?

☐ TP-201.3   Determination of 2 Inch (WC) Static Pressure Performance of Vapor Recovery Systems.

☐ TP-201.3A   Determination of 5 Inch (WC) Static Pressure Performance of Vapor Recovery Systems.

☐ TP-201.3B   Determination of Static Pressure Performance of Vapor Recovery Systems for Above-Ground Storage Tanks.

☐ TP-201.4   Determination of Dynamic Pressure Performance of Vapor Recovery Systems.

☐ TP-201.5   Determination (by Volume Meter) of Air to Liquid Volume Ratio of Vapor Recovery Systems.

☐ TP-201.6   Determination of Liquid Removal of Phase II Vapor Recovery Systems.

☐ Other (describe)

(3) Will the facility representative be available to open and shut down the facility?   ☐ Yes   ☐ No

(4) Are the required records available at the facility?   ☐ Yes   ☐ No

　　　　If No, explain

Note: It is recommended that, prior to testing, new gaskets be placed on the Stage I fill adapters, the drop-tubes, and the spill-manhole drain valves.

Section 4.	STAGE II VAPOR RECOVERY SYSTEM

(1) Do the vapor recovery systems conform with CARB or equivalent certification?

   a. **Stage I**   ☐ Yes   ☐ No

      List the appropriate certification numbers _____

                                                          _____

      If No, explain _____

                                _____

   b. **Stage II**   ☐ Yes   ☐ No

      List the appropriate certification numbers _____

                                                          _____

      If No, explain _____

                                _____

(2) What type of Stage II system is installed?

   1. ☐ Balance.

   2. ☐ Turbine vacuum assist (*pump creates a vacuum in the storage tank and excess vapor is sent to a processor*).

   3. ☐ Collection pump vacuum assist (*the pump draws the vapors from the dispenser driving them to the storage tank with any excess going to a processor*).

   4. ☐ Fluid driven assist (*flow of product drives the pump returning the vapors along the return pipe*).

   5. ☐ Electronic pump assist (*electronic sensors maintain the correct balance of returned gasoline vapors*).

   6. ☐ Jet pump assist system (*a jet of the product generates the vacuum drawing the vapors along the return pipe*).

   7. ☐ Other (*describe*) _____

(3) How are the return gasoline vapor lines formatted?

   ☐ Dedicated (*the vapor from each grade of gasoline returns to the corresponding storage tank*). *

   ☐ Manifolded (*vapors return to the lowest grade storage tank and the tanks are interconnected*).

(4) Are there condensate traps in the vapor return lines? **   *Notes: *Each dedicated system must be tested separately.*

   ☐ No   ☐ Yes   If yes, how many? _____   ***Condensate traps are also called drop-out tanks.*

Section 5.	FUEL STORAGE TANKS

subsection (1).	For all tanks:					
Tank ID Number	Product Stored *(for gasoline, identify grade)*	Tank Capacity (gallons)	Tank Dimensions		Is the Tank Underground? (yes / no)	Does the tank have a submerge fill pipe (yes / no)
			Diameter (feet)	Length (feet)		

subsection (2).	For gasoline tanks only:				
Tank ID Number	Does the tank have:			What is the area of the:	
	A gauge well drop tube which extends within 6" of the tank bottom? (yes / no)	A Stage I vapor balance system? (yes / no)	Vent line restriction? (yes / no)	Fill pipe? (in^2)	Vapor return line? (in^2)
